Sri Lanka is positioning itself as a key regional logistics and distribution hub in Asia. Strategically located in shipping corridors that connect Asia to Europe, the island nation offers logistics, distribution, and different services for all types of ships including ship-related services such as crew changes, replenishment of supplies, etc. for the thousands of ships that annually ply the East-West shipping route in the Indian Ocean.

Based on statistics, Filipinos account for a major percentage in the global maritime labor force. Even with the onset of the pandemic, Sri Lanka continues to cater to Filipino seafarer movement in its ports.

MAC Equity Maritime Services, a leading industry player in the maritime industry of Sri Lanka, is launching a project titled **"Offshore Crew Transit Hub Procedure"** to cater to Filipino seafarer crew changes in a supervised offshore facility with necessary accommodation and medical services.

Accordingly, we would like to request your assistance in inviting your members (agencies and organization) for a virtual presentation, organized by the **Embassy** in partnership with the **Philippine Overseas Employment Administration (POEA)**, on **Tuesday, 19 January 2021 at 2:30pm (PST)**.
